Registered Certified Backflow Testers

All backflow prevention assemblies installed in the City of Wyoming must be tested on frequencies set by the CCC Department. This testing must be performed by a Plumbing or Mechanical Contractor who is an **ASSE (American Society of Safety Engineers) certified tester**, and their current test gauge must be certified for accuracy annually. **We require that all test results be submitted using our web-portal, as we no longer accept forms by email, mail, or fax.**

Below is a current list of companies (as of 6/28/2022) that have met our requirements and are registered to test and electronically submit data in the City of Wyoming. This list is provided as a courtesy and is not intended as an endorsement; the businesses listed below have no affiliation with the City of Wyoming. It is the responsibility of the facility/homeowner to hire an ASSE certified tester and pay for any services rendered. It is recommended to call more than one contractor for price quotes and comparisons before selecting.
